AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

- 1-124. (Canceled)
- 125. (Currently Amended) An antisense oligonucleotide [[14]] 12 to 30 nucleobases in length comprising at least [[14]] 12 contiguous nucleotides nucleobases of SEQ ID NO:247, or a salt form thereof.
- 126. (Currently Amended) The antisense oligonucleotide of claim 125, fourteen 12 to twenty 20 nucleobases in length.
- 127. (Currently Amended) The antisense oligonucleotide of claim 125, wherein the antisense oligonucleotide has a <u>nucleobase</u> sequence comprising <u>the nucleobase sequence of SEQ ID NO:247.</u>
- 128. (Currently Amended) The antisense oligonucleotide of claim 125, wherein the antisense oligonucleotide has a <u>nucleobase</u> sequence consisting of <u>the nucleobase sequence of SEQ ID NO:247.</u>
- 129. (Previously presented) The antisense oligonucleotide of claim 125, wherein the antisense oligonucleotide comprises at least one modified internucleoside linkage.
- 130. (Previously presented) The antisense oligonucleotide of claim 129, wherein the modified internucleoside linkage is a phosphorothioate linkage.
- 131. (Previously presented) The antisense oligonucleotide of claim 125, wherein the antisense oligonucleotide comprises at least one modified sugar moiety.
- 132. (Previously presented) The antisense oligonucleotide of claim 131, wherein the modified sugar moiety is a 2'-O-methoxyethyl sugar moiety.
- 133. (Previously presented) The antisense oligonucleotide of claim 131, wherein the modified sugar moiety is a bicyclic sugar moiety.
- 134. (Previously presented) The antisense oligonucleotide of claim 125, wherein the antisense oligonucleotide is a chimeric oligonucleotide having a plurality of 2'-deoxynucleotides flanked on each side by at least one nucleotide having a modified sugar moiety.

- 135. (Previously presented) The antisense oligonucleotide of claim 134, wherein the modified sugar moiety is a 2'-O-methoxyethyl sugar moiety.
- 136. (Previously presented) The antisense oligonucleotide of claim 134, wherein the modified sugar moiety is a bicyclic sugar moiety.
- 137. (Previously presented) The antisense oligonucleotide of claim 125, wherein the antisense oligonucleotide comprises at least one modified nucleobase.
- 138. (Previously presented) The antisense oligonucleotide of claim 137, wherein the modified nucleobase is a 5-methylcytosine.
- 139. (Currently Amended) The antisense oligonucleotide of claim 125, wherein the antisense oligonucleotide is [[in]] a salt form.
- 140. (Currently Amended) The antisense oligonucleotide of claim 139, wherein the antisense oligonucleotide salt form is a sodium salt form.
- 141. (Previously presented) A composition comprising the antisense oligonucleotide of any one of claims 125-140 and a pharmaceutically acceptable carrier or diluent.
- 142. (Currently amended) An antisense oligonucleotide 20 nucleobases nucleotides in length having the sequence of nucleobases as set forth in SEQ ID NO:247 and comprising 5-methyleytidine 5-methyleytosine at nucleobases 2, 3, 5, 9, 12, 15, 17, 19, and 20, wherein every internucleoside linkage is a phosphorothioate linkage, nucleobases nucleotides 1-5 and 16-20 are 2'-O-methoxyethyl nucleotides, and nucleobases nucleotides 6-15 are 2'-deoxynucleotides, or a salt thereof.
- 143. (Currently amended) The antisense oligonucleotide of claim 142, wherein the antisense oligonucleotide is [[in]] a salt form.
- 144. (Currently amended) The antisense oligonucleotide of claim 143, wherein the antisense oligonucleotide salt form is a sodium salt form.
- 145. (Previously presented) A composition comprising the antisense oligonucleotide of any of claims 142 144 and a pharmaceutically acceptable carrier or diluent.
- 146-196. (Canceled)
- 197. (Currently Amended) An antisense compound [[14]] 12 to 30 nucleobases in length and fully complementary to SEQ ID NO:3, wherein said compound is targeted to the range of nucleotides 3230-3287 as set forth in SEQ ID NO:3, or a salt thereof.

- 198. (Currently Amended) The antisense compound of claim 197, which is [[14]] 12 to 20 nucleotides nucleobases in length.
- 199. (Previously presented) The antisense compound of claim 197, which is an antisense oligonucleotide.
- 200. (Previously presented) The antisense oligonucleotide of claim 199, wherein the antisense oligonucleotide comprises at least one modified internucleoside linkage.
- 201. (Previously presented) The antisense oligonucleotide of claim 200, wherein the modified internucleoside linkage is a phosphorothioate linkage.
- 202. (Previously presented) The antisense oligonucleotide of claim 199, wherein the antisense oligonucleotide comprises at least one modified sugar moiety.
- 203. (Previously presented) The antisense oligonucleotide of claim 202, wherein the modified sugar moiety is a 2'-O-methoxyethyl sugar moiety.
- 204. (Previously presented) The antisense oligonucleotide of claim 202, wherein the modified sugar moiety is a bicyclic sugar moiety.
- 205. (Previously presented) The antisense oligonucleotide of claim 199, wherein the antisense oligonucleotide is a chimeric oligonucleotide having a plurality of 2'-deoxynucleotides flanked on each side by at least one nucleotide having a modified sugar moiety.
- 206. (Previously presented) The antisense oligonucleotide of claim 205, wherein the modified sugar moiety is a 2'-O-methoxyethyl sugar moiety.
- 207. (Previously presented) The antisense oligonucleotide of claim 205, wherein the modified sugar moiety is a bicyclic sugar moiety.
- 208. (Previously presented) The antisense oligonucleotide of claim 199, wherein the antisense oligonucleotide comprises at least one modified nucleobase.
- 209. (Currently amended) The antisense oligonucleotide of claim 208, wherein the modified nucleobase is a <u>5-methylcytidine</u> <u>5-methylcytosine</u>.
- 210. (Currently amended) The antisense compound of claim 197, wherein the antisense compound is [[in]] a salt form.
- 211. (Currently amended) The antisense compound of claim 210, wherein the antisense compound salt form is a sodium salt form.

- 212. (Previously presented) A composition comprising the antisense compound of any one of claims 197-211 and a pharmaceutically acceptable carrier or diluent.
- 213.-215. (Canceled)
- 216. (New) The antisense oligonucleotide of claim 125 which is 20 nucleobases in length.
- 217. (New) The antisense oligonucleotide of claim 216, having
 - a gap segment of ten linked 2'-deoxynucleosides,
 - a 5' wing segment of five linked nucleosides, and
 - a 3' wing segment of five linked nucleosides,

wherein the gap segment is positioned between the 5' wing segment and the 3' wing segment, wherein each nucleoside of each wing segment comprises a 2'-O-methoxyethyl sugar modification, and wherein each internucleoside linkage is a phosphorothioate internucleoside linkage.

- 218. (New) The antisense oligonucleotide of claim 217, wherein the antisense oligonucleotide comprises at least one modified nucleobase.
- 219. (New) The antisense oligonucleotide of claim 218, comprising wherein the modified nucleobase is a 5-methylcytosine.
- 220. (New) The antisense oligonucleotide of claim 219, wherein each cytosine is a 5-methylcytosine.
- 221. (New) A composition comprising the antisense oligonucleotide of claim 125 and a penetration enhancer.
- 222. (New) The composition of claim 221, wherein the penetration enhancer is capric acid or lauric acid.
- 223. (New) A composition comprising the antisense oligonucleotide of claim 125 and at least one additional pharmaceutically active material.
- 224. (New) The composition of claim 223, wherein the at least one additional therapeutic agent is an anti-inflammatory agent.
- 225. (New) The composition of claim 145, further comprising at least one additional pharmaceutically active material.
- 226. (New) The composition of claim 225, wherein the at least one additional therapeutic agent is an anti-inflammatory agent.
- 227. (New) The antisense oligonucleotide of claim 197, which is 20 nucleobases in length.

- 228. (New) The antisense oligonucleotide of claim 227, having
 - a gap segment of ten linked 2'-deoxynucleosides,
 - a 5' wing segment of five linked nucleosides, and
 - a 3' wing segment of five linked nucleosides,

wherein the gap segment is positioned between the 5' wing segment and the 3' wing segment, wherein each nucleoside of each wing segment comprises a 2'-O-methoxyethyl sugar modification, and wherein each internucleoside linkage is a phosphorothioate internucleoside linkage.

- 229. (New) The antisense oligonucleotide of claim 228, wherein the antisense oligonucleotide comprises at least one modified nucleobase.
- 230. (New) The antisense oligonucleotide of claim 229, comprising at least one modified cytosine, wherein the cytosine is a 5-methylcytosine.
- 231. (New) The antisense oligonucleotide of claim 230, wherein each cytosine is a 5-methyl cytosine.
- 232. (New) An oral formulation comprising the antisense compound of claim 197 and a pharmaceutically acceptable diluent or carrier.
- 233. (New) The formulation of claim 232, wherein said formulation comprises a penetration enhancer.
- 234. (New) The composition of claim 233, wherein the penetration enhancer is capric acid or lauric acid.
- 235. (New) A composition comprising the antisense oligonucleotide of claim 197 and at least one additional pharmaceutically active material.
- 236. (New) The composition of claim 235, wherein the at least one additional therapeutic agent is an anti-inflammatory agent.
- 237. (New) The antisense oligonucleotide of claim 133, wherein the bicyclic sugar moiety has a (-CH₂-)_n group forming a bridge between the 2' oxygen ant the 4' carbon atoms of the sugar ring, wherein n is 1 or 2.
- 238. (New) The antisense oligonucleotide of claim 136, wherein the bicyclic sugar moiety has a $(-CH_2-)_n$ group forming a bridge between the 2' oxygen ant the 4' carbon atoms of the sugar ring, wherein n is 1 or 2.

- 239. (New) The antisense oligonucleotide of claim 204 wherein the bicyclic sugar moiety has a $(-CH_2-)_n$ group forming a bridge between the 2' oxygen ant the 4' carbon atoms of the sugar ring, wherein n is 1 or 2.
- 240. (New) The antisense oligonucleotide of claim 207 wherein the bicyclic sugar moiety has a $(-CH_2-)_n$ group forming a bridge between the 2' oxygen ant the 4' carbon atoms of the sugar ring, wherein n is 1 or 2.
